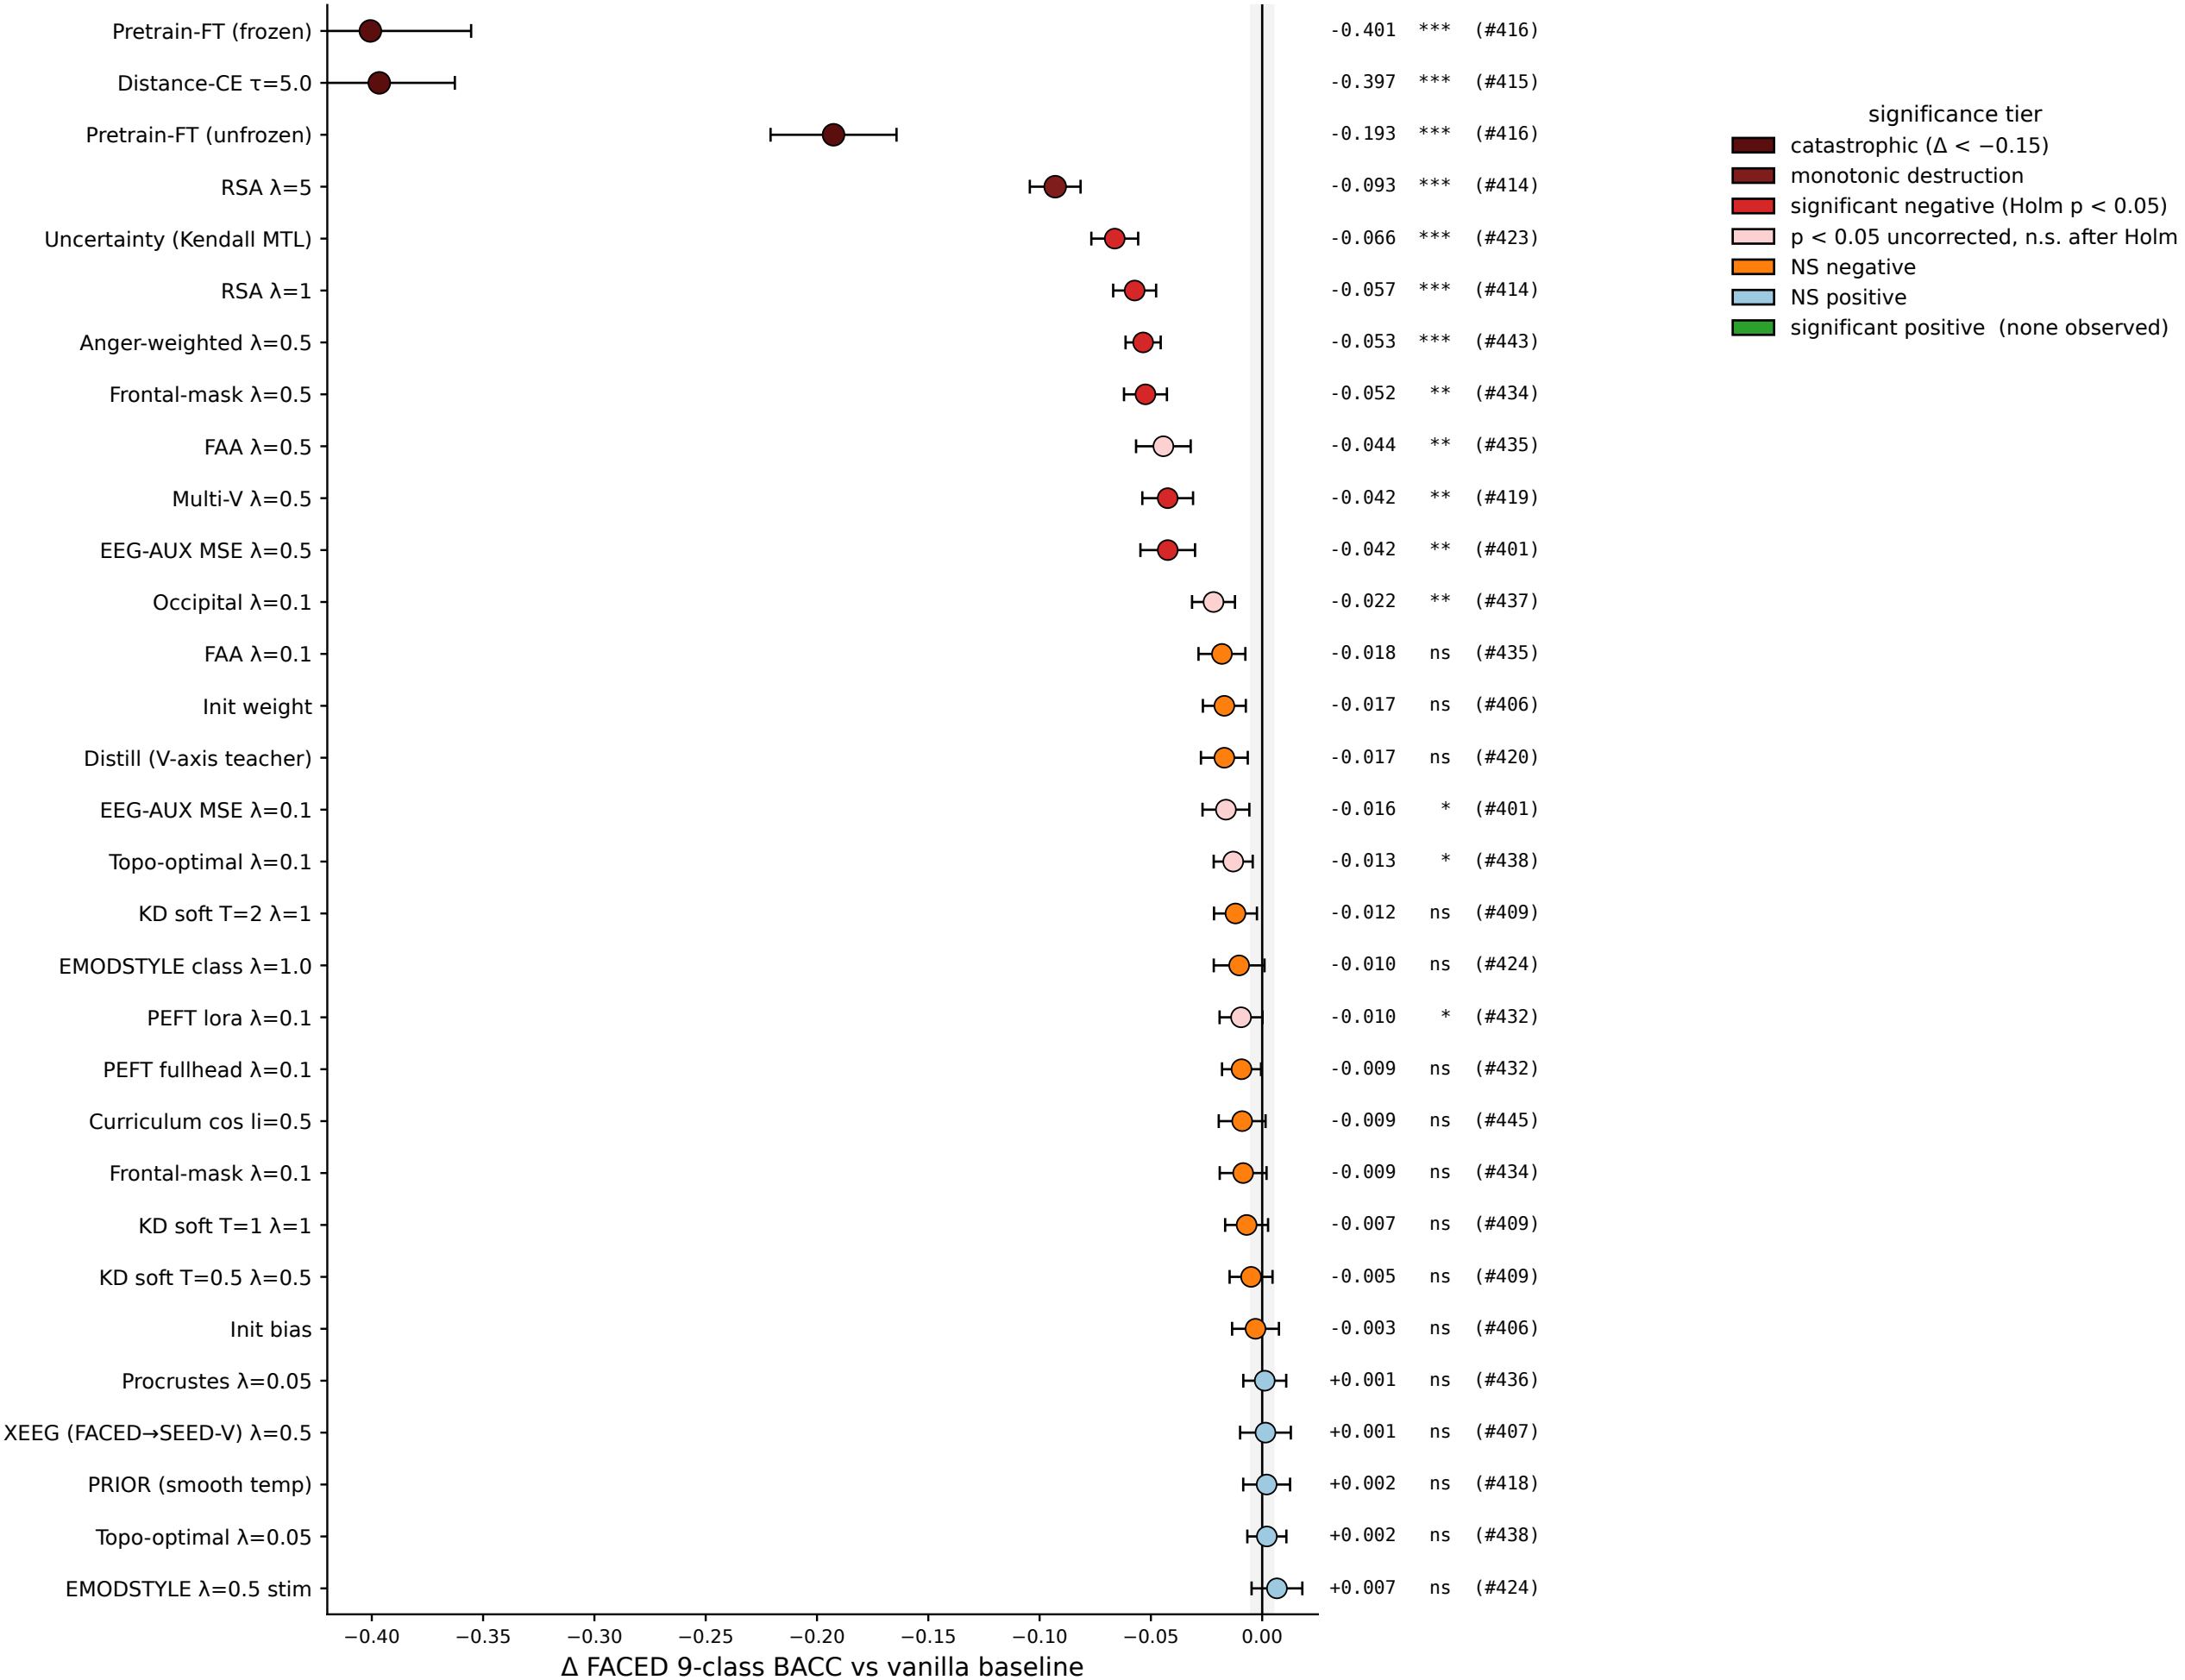
All 25+ V-axis-as-supervision interventions, ranked by Δ

Forest plot of the saturation regularity: zero successful interventions at the converged baseline



Bars = 95% CI from a paired t-test (1.96 × σ/√n). Asterisks (uncorrected paired p): ***p<0.001, **p<0.01, *p<0.05; colours use Holm over the 25 table rows.
