

The LLM valence axis predicts the cohort EEG response (160-feature DE ridge) across 28 stimuli and 14 LLMs

dashed circle: 9 emotional-pole stimuli (Anger $\times$ 3, Amusement $\times$ 3, Tenderness $\times$ 3) — these alone drive the cohort signal
($n=9 \rightarrow r = 0.870$; $n=19$ mid-stim $\rightarrow r \approx 0$)

emotion class

Anger Disgust Fear Sadness Neutral Amusement Inspiration Joy Tenderness
