

The LLM valence axis predicts the cohort EEG response (160-feature DE ridge) across 28 stimuli and 14 LLMs

dashed circle: 9 emotional-pole stimuli (Anger × 3, Amusement × 3, Tenderness × 3). The pole contrast drives the single PO3/γ channel (n=9 → $r = 0.87$; n=19 mid-stim → $r \approx 0$); the 160-feature ridge plotted here stays $r = 0.88$ on the 19 mid-valence stimuli.

emotion class

- Anger
- Disgust
- Fear
- Sadness
- Neutral
- Amusement
- Inspiration
- Joy
- Tenderness
